CSCE Cold Regions Engineering Division Member Update (December 2016)

Dear Member:

I would like to take this opportunity to remind all CSCE members of the CSCE Annual Conference in Vancouver from May 31st to June 3, 2017 at the Bayshore Westin Hotel. The deadline for abstract submission has been extended to today, December 20th, 2016 (please see <http://csce2017.ca/> for more details). While there are no specific cold regions conferences planned for the 2017 year, we are encouraging any members working on projects in northern regions to submit abstracts for our Annual Conference.

In addition to this, CRED will be sending out electronic quarterly case studies of innovative civil engineering projects underway in northern and arctic regions. Case studies will act as a chance to showcase these specialized projects in addition to building our small division. The updates will reach all members of the CSCE who share your interest in cold regions engineering. If you would like to be featured in a case study or for additional information about how to become more involved in CRED, please contact me at matt.follett@stantec.com.

I hope you all have a safe and relaxing holiday.

Thanks,

Matthew Follett, M.A.Sc., P.Eng.
Chair, Cold Regions Division, CSCE
