

### Transportation Division Update – September 2017

Dear Transportation Division Members:

Summer is going too fast and hope all of you did have a great summer! It is my pleasure to update you on the CSCE Transportation Division. The 4<sup>th</sup> International Conference on Transportation Information and Safety (ICTIS) took place in the beautiful rocky mountain area – Banff in Alberta, and Canadian Society for Civil Engineering (CSCE) has co-sponsored this conference. The theme for the conference is Transportation Information and Safety in Intelligent and Connected Environment. More than 200 researchers, engineers and students participated in this conference, and tens of CSCE members are part of them. CSCE Transportation Division is proud of being part of the conference, and would like to continue to support this conference. The next ICTIS conference will be hold in Liverpool which is another amazing city to explore.

CSCE Annual Conference 2018 started, and we will have a transportation specialty conference in the Fredericton gathering. I encourage all of us to submit the abstracts to share your knowledge update and innovated thinking with the community. At the same time, we always welcome volunteers to participate in reviewing the papers. Transportation industry is experiencing the disruptive change owing to the next technology – Big data, Internet of Things, etc. We are organizing a special issue for Canadian Civil Engineer, and the them is Transportation and Artificial Intelligence. If you have any interest to publish an article in this magazine, please feel free to contact me.

Hope you will have another productive year! Look forward to seeing you all at 2018 CSCE Annual Conference in Fredericton.

Tony Qui
